

CVCC Summer Camp

“Discover IT”

Lesson Plans for Friday:

8:00 – 8:45 (30 minutes):

The Internet

Students will learn what the Internet is, what the World Wide Web is, and what the difference is between the two. We will use online videos to introduce the topics before discussing them in class.

8:45 – 9:30 (45 minutes):

Configuring a Router

Students will learn how-to configure a wireless Linksys Router. After configuring the SSID with the student’s name, we will use Wireless USB adapters to view all the available wireless networks being broadcast in the classroom. We will learn how to secure our wireless networks.

9:30 - 10:00 (30 minutes):

Finishing the Poster board Project

Students will finish decorating their poster board and making it look great for parent presentation.

10:00 – 10:15: Students will display their Poster Boards in the Cafeteria.

10:15-11:00 (45 minutes):

Free Time

Students will be given this time to finish, or continue to work on any project started during the week.

11:00-12:00 (60 minutes):

Outdoor Education for Technology Students

Students will be told how important it is to appreciate the out-of-doors and not spend so much time indoors on computers or using other technology. Students will be instructed to find a spot of their own outdoors and record the sounds that they hear and the sights that they see. Students will also record what they were thinking at the time. Students will be instructed to find their own private places at home where they can go to get away from technology and learn to appreciate the natural world.

12:00-1:00 Final Day Luncheon Program
